# Smartlift Jackbox.

Hesco's unparalleled reputation in engineered force protection and flood defence, and Smartlift's trusted brand of supplying woven PP products has led to a unique partnership to provide the next generation of defensive flood barrier.

The need for a lighter, more easily transportable unit has led to the launch of JACKBOX™

JACKBOX™ moves beyond traditional gabion technology of wire mesh to provide a self-supporting, light and flexible barrier; creating earth-filled units that protect against flood and storm events.

JACKBOX™ flood units utilize an impermeable front facing material to minimize seepage, while the rest of the unit comprises of a semi-permeable material to allow drainage of water within the fill material. The unit is also fitted with a lid to prevent loss of fill material during over-topping and extreme weather conditions.

## Key Features:

- **Easy to use and deploy using the concertina design**
- **Available in two different sizes to suit most needs**
- **Each cell is self-supporting Comes with an impermeable front and top membrane**
- **Quick and speedy dismantle and disposal**
- **Tested at the world renown Engineer Research & Development Centre (ERDC) in Vicksburg, Mississippi, USA**

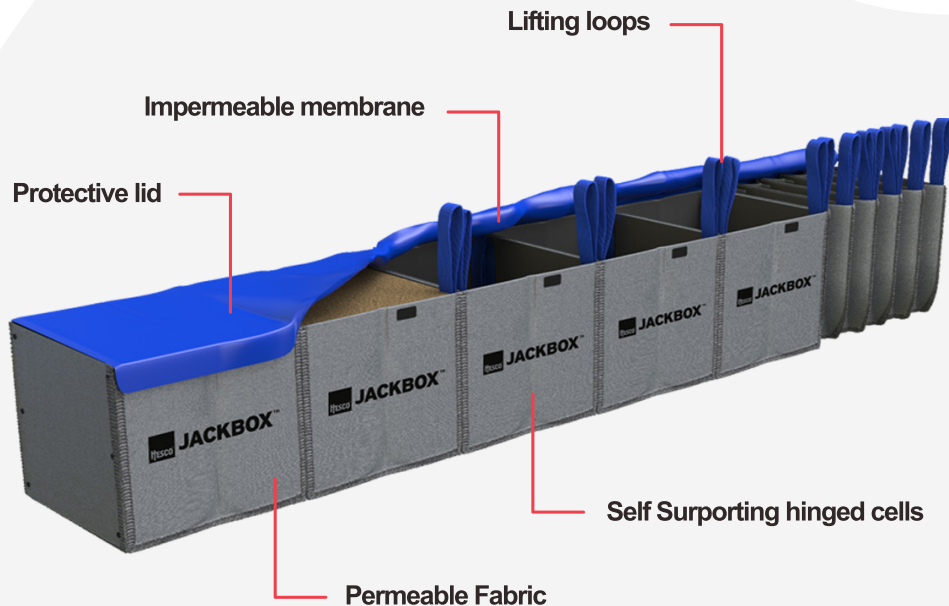

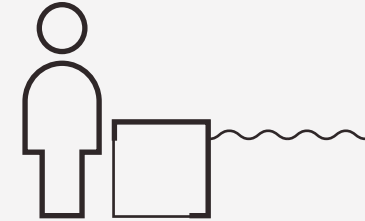

## Ease of use:

The hinged box allows for easy deployment.

## How it works:

2' unit stops up to 2' of water.
