Food Grade FIBC

The control points in place at our BRC AA+ certified production unit help minimise the risk of contamination in our food grade FIBC's, helping to meet the demands and expectations of the food manufacturers in the UK and Europe.

The clean room is segregated from the general production area. Only the most experienced operators are chosen and given ongoing training for the hygiene production lines, and all workers must abide by specific rules and regulations, which include wearing protective clothing.

EVER THOUGHT ABOUT CUSTOM PRINTED??

This is a great way of advertising your business...

Customisation of FIBC's is a feature that many of our customers find beneficial. Printed FIBC's offer good exposure especially when your company details are printed on all four sides of the bag.
